

Healthy Air Living Partner Letter of Commitment

The Valley faces unprecedented challenges in realizing clean air due to our perfect environment for pollution created by our natural geography and topography.

Although advancement toward clean air has been made through innovation and participation among all segments of the Valley, we have a long way to go.

In order to meet health-based standards for clean air in the San Joaquin Valley, we must reduce our emissions Valley-wide which will require the active participation of every organization and business.

The Valley Air District's Healthy Air Living initiative encompasses a year-round approach to weaving choices into the fabrics of our lives that result in cleaner air and therefore better health for the Valley's residents.

As a Healthy Air Living Partner, our organization understands the importance of taking steps to reduce our emissions. We have embraced air-quality improvement through a commitment to a better quality of life for all Valley residents.

As the organization's CEO, President or lead worksite decision-maker, I commit my organization to put into place, wherever possible, Healthy Air Living strategies and to educate our employees/members on ways they can reduce their driving and adopt alternatives to pollution-creating practices.

Our organization is committed to the goal of clean air, and we believe we can be part of the solution.
